

## Thank you for joining us at the 2017 ROW Management Conference

On behalf of the Right of Way Management Conference Organizing Committee, I would like to thank all that participated in the 3<sup>rd</sup> annual Right of Way Management Conference! A special thank you to our keynote speaker Jim Ansapch from Cardno who travelled from Oregon to deliver a fascinating presentation on the History of Technology in Subsurface Utility Engineering. Additional thank you to Kelly Hess from the City of Calgary and Ed Plant, representing the Federation of Canadian Municipalities, for travelling from Alberta to participate on the expert panel session. The conference was a great success with over 250 participants from across Canada. Attendees participated in a variety of informative and interesting sessions including such topics as Subsurface Utility Engineering, Utility Coordination, Locates, GIS, Accessibility in Public Realm, Permitting, Access to the Right of Way and New Technologies. In addition to the engaging sessions, the day offered a time of coming together and networking with those within the right of way management industry. Thank you to our exhibitors and sponsors for their generous support.

Tracey Anasatcio and Steve Murphy

## Interview With Attendees

*"The ROW Management Conference is a great way to network with other municipalities and industry leaders to discuss the issues and solutions for managing our increasingly congested right-of-ways."*

**- Joe Costanza**

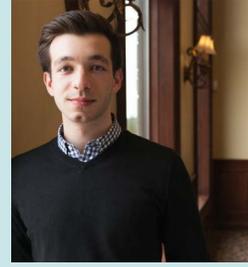

*"Ontario One Call has been a supporter for the Right of Way Conference since day one. There is tremendous value for all municipalities in attendance in networking, idea sharing and best practice generation. Bringing ROW professionals, planners and utilities together to bridge gaps and better understand each other's processes has already lead to successes and will certainly lead to many more. Your success in ROW management is our success. We hope you will join us at the ROW Management Conference in 2018."*

**- Jeff Hitchcock**

*"This conference provides networking and face-to-face communication which generates improvements for everyone."*

**- Leslie Elliott**

*"The ROW Management Conference was a fantastic event. The high quality speakers made the day more than worth it. I learned a lot about how technology can be applied to ROW management, and how important effective information management practices are for long term planning and problem solving. I would recommend this event to anyone who wants to get a better understanding of the advances that are happening across the industry."*

**- Thomas Lillo**

*"The ROW Management Conference provided a great opportunity for us to speak with contractors and employees from the public works departments near our facilities. Our safety information and the importance of using Ontario One Call was communicated to many people at this event and we will definitely be returning next year."*

**-Gretchen Gordon**
